

IT Inclusive Language Guides

Objectives:

- Introduce students to IT Inclusive Language Guides
- Review at least one of the IT Inclusive Language Guides
- Consider the impact of using inclusive language
- Consider the impact of having a formal IT Inclusive Language Guide

IT Inclusive Language Guides:

Step 1) Choose one of the following IT Inclusive Language Guides to read through:

- A. University of Washington: <https://itconnect.uw.edu/guides-by-topic/identity-diversity-inclusion/inclusive-language-guide/>

OR

- B. University of Wisconsin - Madison: <https://it.wisc.edu/learn/inclusive-language-for-it/>

OR

- C. Research and Education Networks - Information and Analysis Sharing Center: https://www.ren-isac.net/public-resources/Inclusive_Language_IT.html

Step 2) Reflect on the following questions and write-down your answers:

- A. Which IT Inclusive Language Guide did you choose to read through?
- B. What impact do you think using inclusive language as described in the guide has on the students at the related university?
- C. Do you think having a published IT Inclusive Language Guide will have an impact on database design choices at the related university? Why or why not?
- D. Do you think companies should have a published (possibly just internally) IT Inclusive Language Guide that their designers, developers, and other IT staff should use? Why or why not?

Introduction to Databases

Step 3) Submit the written answers as described by your instructor.
