1 Review Questions

1.1 Remix 1: Real Estate Agents (Ratio Word Problem)

Trina and Devin both work for Northbrook Properties. Over the past quarter, they closed a total of 204 home sales. Trina sold 4 times as many homes as Devin. How many homes did each of them sell?

1.2 Remix 2: Book Sales (System with Cost & Quantity)

Taylor and Jordan sold textbooks for a campus fundraiser. Taylor managed to sell six times more books than Jordan. Together, they sold 133 books in total. How many books did each person sell?

1.3 Remix 3: Fundraiser (Extreme Sales Ratio with Total)

Liam and Avery were selling raffle tickets for their school's music program. Tickets were \$10 each. Avery got a shoutout during morning announcements for outselling everyone — she sold 14 times as many tickets as Liam. Together, they sold 225 tickets. How many did each of them sell?

1.4 Remix 4: Ice Cream Shop (Cost + Proportional Quantity)

A dessert truck sells cookies for \$3 and milkshakes for \$7. Last month, they sold 4 times more cookies than shakes, and made \$5,160 in total sales. How many cookies and shakes did they sell?
